CIRCUIT DESIGNING AND BUILDING

SPECIFICATION

❖ TEAM - Maximum-2

❖ ARENA -

1. Desk arrangement in the classroom having electrical supplies.
2. Whole desk arrangement should be in 'U' shape
3. At the time of presentation all the team members should be present

Rules and Regulations

1. Everyone should have their laptop.
2. If any participant uses breadboard then they should have their own components [it should be disassembled before the participating], at the time of presentation they can assemble it and implement the circuit.
3. If they want to show in software then they can do so otherwise they have to show practically.

Rounds

- Round1:-In this, group will assemble their components in given time. Time will be 1hr or 2hr,who complete the part of assembling in that time and if it works properly and unique then it goes on the next level.
- Round2:-After passing round 1 they go to next round .In this best ideas goes for judging again by using the parameter whose circuit is unique and take less time for compiling and that group will win.

REGISTRATION FEE – 100/-
